

who cannot be attended to in their own homes, with any hope of cure, may be admitted to the hospital. But there should be associated with every nurse or doctor some workers who are wholly given up to evangelistic work. Through lack of these much of the influence of the medical missionary fails to accomplish its wished-for result. The doctors and nurses feel this themselves strongly. The same is felt everywhere amongst educational missionaries. The work of the school needs to be followed up by the visit to the home. There are countless doors open to the young wives who have been taught in school, and who would delight in a visit from one of the mission ladies.

This might be done by older workers and we earnestly urge that women's missionary boards and societies should be willing to receive women for this department older than they can take for school or medical work. The language is learnt through constant intercourse with the women. If older women who could meet their own expenses might be allowed to give themselves solely to this evangelistic work, we believe that a large increase would be made to our missionary force.

Women's settlements are only beginning to be tried in different parts of the field, but we believe that this method would be found very helpful both in towns and villages, but especially in the villages. The thought is, to have a group of about four workers and one or two native helpers living to-
